

# INSTALLISATION OF GIT

For installation git open your browser and search for download git or click on the link: [Git - Downloads \(git-scm.com\)](https://git-scm.com)

The screenshot shows a web browser window with a Bing search results page for the query "git official site". The browser's address bar shows the URL: <https://www.bing.com/search?q=git+official+site&form=ANSPH1&refig=875576b1183944bfb4801bccb8dd7d47&pc=...>. The search results are displayed under the heading "git official site". The first result is for "Git" with the URL <https://git-scm.com>. The description states: "Git is a free and open source distributed version control system designed to handle everything from small to very large projects with speed and efficiency.. Git is easy to learn and has a tiny footprint with lightning fast performance. It outclasses SCM tools like Subversion, CVS, Perforce, and ClearCase with features like cheap local branching, convenient staging areas, and multiple workflows." Below the description are links for "Downloads", "GUI Clients", "Book", and "Gittutorial". To the right of the main results is a sidebar with a "Git" section featuring the Git logo, a description of Git as a distributed version-control system, and links to Wikipedia, the Official site, and Facebook. Below this, it lists developers (Linus Torvalds, Junio Hamano), languages (C, Shell, Perl, Tcl, Python), and license (GPLv2, LGPLv2.1, and others). At the bottom of the sidebar is a section "People also search for" with links to GitHub, Visual Studio, Subversion, and Jira Software. The Windows taskbar is visible at the bottom of the screen.
